ZIFF-DAVIS LOSES SYNC--PICTURE UNCLEAR

SYNC magazine, first announced in SYNTAX's 2d issue, ceased publishing with the March/April 1984 issue. Founded by David Ahl, SYNC built on the resources of its sister publications & became a fast-growing, friendly competitor to SYNTAX. In fact, SYNC advertised in SYNTAX, Dec.81, & SYNTAX had also advertised in SYNC, but after Ziff-Davis purchased SYNC, we could no longer advertise in SYNC, and ultimately in any Ziff computer group publication.

SYNC grew rapidly in circulation and ad pages, becoming the volume leader of ZX/TS support publications. At its death, SYNC was serving nearly 40,000 subscribers. Defiant to the last, Ziff-Davis officials failed to return our phone calls--we've no idea what they will offer you.

Separately, Ziff-Davis informed a major mailing list broker that the SYNC magazine subscriber names will not be available for purchase or rental as a separate list. Ziff-Davis will combine the lists with those of their other publications.

TIMEX TO OFFER TS2068 TECHNICAL INFORMATION

Doug Smith of Timex informs SYNTAX that the information in Timex Technical Memos 1-9 and the 3rd Party Software Guide will be amended corrected and then distributed through their Little Rock, AK service facility. The packet will be available (beginning in May) for an undetermined fee. No nondisclosure agreement will be required.

TS2068 schematics can be obtained now for \$2.50 by writing the Little Rock repair facility at:

Timex Computer Corporation
Little Rock Product Service Center
Little Rock, AK 72203

No nondisclosure agreement required for this.

SYNTAX ERRORS: Program 1 in Recipes for 2068 Advanced Video, Feb.84, must be RUN twice right after loading from tape and gives a false error the first time.

In New Products and Services, Feb.84, Andropos Technology's name is actually Apropros Technology.

PROGRAM IMPROVEMENTS

In Reusable Loops, Jan.84, you ask for a memory efficient way to test a variable for "none of the above." Replace line 5 with:

```
5 GOTO 3+3*((K#="P")+ (K#="S")
+(K#="O")+ (K#="I")+ (K#="A"))
```

The program will only GOTO line 6 if one of the relations in brackets holds true, otherwise it goes to 3.

R. F. Fraser-Smith, Chicago, IL

VENDOR REPORT

Timex will not produce the 2060 Interface, 2065 Microdrive, or 2080 Printer (announced in SYNTAX Jan.84). The 2050 Modem has been sold in some places but may have a heat sensitivity problem. 2020 Cassette Decks are available but offer no benefit over any good cassette deck and may have some design problems.

Hawg Wild Software intends to continue supporting the ZX/TS.

Marge Saylor of Compusa verified that they have a 35% charge for restocking unauthorized returns. Authorized returns that work according to their claims are charged 10-20%. Authorized returns that do not work have no restocking charge. This policy does not appear in their ads.

Thomas B. Woods plans to continue developing software for the ZX/TS and TS2068. See his announcement on page 3.

SimulSION (formerly Lamo-Lem Labs) has a new address: Box 2382, La Jolla, CA 92038. Their phone number is still 619/263-6591.

Quicksilva Inc. (426 West Nakoma, San Antonio, TX 78216, 512/340-3684) still has software available for the ZX/TS and games for the TS2068. They plan to market a software line for the QL including educational programs, utilities, and games.

ZX/TS USERS' GROUPS

To check for a local group that's not listed, or to announce a new group, call 617/456-3661 or write SYNTAX, RD 2 Box 457, Bolton Rd., Harvard, MA 01451. Send SASE for name of group in your area.

Andover, KS: Air Capital Users Group, c/o Randy Cummings, 124 W. 10th St., Andover, KS 67002, 316/733-0242.

Louisville, KY: Bruce S. Chang, 6 Rio Vista Dr., Louisville, KY 40207, 502/458-6163.

Matawan, NJ: Aerco Disc Nationwide Users Group, c/o Burke Mawby, POB 49, Matawan, NJ 07747, 201/566-7445 (bus), 201/583-4675 (res).

Amarillo, TX: New group forming, contact Joe E. Jenkins, 3100 Mockingbird, Amarillo, TX 79109, 806/355-3185.

HARDWARE HINT--ZX-99

A 10 Ohm, 1/4 Watt resistor in series with the hot lead of the ZX-99 Tape Controller remote line may prevent the internal relay from sticking closed.

If you want to add this resistor without opening up your ZX-99, it can be fit inside the remote plug to the cassette deck.

Jay Siegel, Brooklyn, NY

NEW PRODUCTS AND SERVICES

PRO/FILE 2068 stores your database of up to 28,000 characters organized into files ("screens") and allows fast searching, user formatted printing, screen editing, and alphabetized file index. Available now, full documentation to come later, \$29.95 cassette from Thomas B. Woods, POB 64, Jefferson, NH 03583, 603/586-7734.

ROMPAK now offers 5 ROMs for their \$16.95 ROM cartridge board (see review SYNTAX Jan.84): ZX PRO/FILE, Thomas Woods database program for ZX/TS (\$24.95), TEXTWRITER word processor (\$24.95), QUICKLOAD, LOADS and SAVES 16K in 30 seconds (\$17.95 sep., included in PRO/FILE and TEXTWRITER ROMs), VIRTUOSO music program (\$15.95), and GRAPHIX PAK utility routines (\$16.95). Plans for 2716, 32, 64 EPROM programmer \$15. ROMPAK Inc., Suite 100, 8206 Blackburn Ave., Los Angeles, CA 90048, 213/653-9741.

CLS (POB 104, Cochituate, MA 01778) publishes a telephone directory of toll-free 800 numbers for leading high-tech computer firms (\$3 PPD).

JRC SOFTWARE (POB 448, Scottsburg, IN 47170 812/752-6071, -5106) offers the TS1000 Incredible Super Tape (\$24.95 + \$.37 SASE) with over 20 programs, most in MC. Includes sound effects, system programs, an oscilloscope program, tape unlock, assembler, text editor, etc. Similar package for TS2068s also available, including Hi-Res Lander, Oscilloscope, and The Great Graphics Show. All with a 10-day unconditional money-back guarantee.

Games to Learn By (POB 575, Williamsburg, MA 01096 413/268-7505) offers 3 new TS2068 games: DeathChase (3-D motorcycle chase) for \$19.95, Mystery Manor (graphic adventure) for \$15.95, and Art for All Ages (2068 canvas) for \$15.95.

Fidelity Brokerage Services (82 Devonshire St., Boston, MA 02109 800/343-8722) announces the first national home brokerage trading service, allowing subscribers to enter buy and sell orders on listed and OTC stocks and options 24 hours a day. Any terminal or computer with a modem may be used (MD-2 and ZX/TS or MD-68 and TS2068, for instance). Access is via TELENET. Available for a one-time subscription charge of \$195, plus \$.40/min. (business hours) or \$.10/min (non-business hours).

WHEN YOU ORDER...

Please mention that you saw it in SYNTAX. We can't grow unless advertisers know you read us.

SOFTWARE HINT--TS2068

To put the TS2068 (or ZX Spectrum) in caps mode (C cursor) from within a program, use: POKE 23658,8. Reset with POKE 23658,0.

Randy Cummings, Andover, KS

HARDWARE HINT--TS2068

To use the ZX printer with the 2068, wire a 9VDC power supply to the printer (do not connect to edge connector).

HARDWARE HINT--TS2040

Your TS2040 Printer can use the thermal paper sold by Radio Shack for use with their 40 column Color Computer printer.

AVAILABLE FROM SYNTAX...

If you get **The Works** before Apr.15, you can select, absolutely **FREE**, any three products (including a 16K RAMpak, The ZX81/TS1000 Home Computer Book, VU-CALC, Frogger, and many other Timex software titles) from the list on the back cover of SYNTAX, February 84.

DEAR EDITOR:

I could not believe the pullout of Timex until I read it in SYNTAX! It breaks my heart to see a superior product like the 2068 left an orphan. However, it was heartening to read your page 10 statement of intent. I wholeheartedly support your stand and will do all I can to support your publication.

I have always mentioned your name when I bought a product advertised in SYNTAX and there have been many occasions.

Looking forward to all future issues, I am yours truly,

Virginia T. Lake, Wilmington, DE

Is there any additional documentation available for the Timex Vu-Calc program? There must be a better description than the one that comes with the tape.

Don Durst, Kettering, OH

Our list of ZX/TS Books in Print (this issue) lists two books about Vu-Calc, ISBN 0-07-001698-4 for the TS2000 (presumably meaning 2068) and ISBN 0-89303-941-1 for ZX/TS.

I am trying to get a copy of the UK manual for the ZX Spectrum. The abbreviated 2068 manual does not cover the computer sufficiently and it may be doomsday before the Timex people come out with their own advanced manual. Of course, I am willing to buy the book if I knew where to get it.

Warren Fricke, Depew, NY

Sinclair's U.S. office cannot obtain Spectrum manuals for Timex customers since they do not support the TS2068. Timex will not publish the Advanced Programming Manual, however, they will make available technical information for the 2068 starting in May. Schematics are available now. See story, page 1.

After successfully using the old Sinclair ZX Printer for over a year, it finally gave out on me, and I decided to invest in the new Timex-Sinclair 2040 Printer.

I am very disappointed in the product, specifically because the print is too light. Does anyone know of a way to improve the printing quality of the TS2040, so that it prints a darker, heavier image, at least as readable as the old ZX printer?

Two separate phone calls to Timex have produced nothing but a "ho-hum" attitude. They don't seem to know anything about printing quality, and can't even tell me where I can buy replacement paper.

Dan R. Sullivan, Seattle, WA

TS2040s print darker on Radio Shack 40 column thermal paper. We use it at SYNTAX for all our listings.

I was shocked, as I'm sure many were, by the news that Timex was getting out of the computer business. And I'm worried about the alarming decrease in the SYNTAX's size and ad volume. I almost feel I am the proud (?) owner of an unwanted orphan. Has my 16K ZX81 hit a dead end?

I hope not. The Timex Sinclair line remains an excellent value. The departure of Timex has created an opportunity for smaller, low-overhead operations to step in and fill the need for continued support of the T/S line.

SYNTAX can play a badly needed role. People need to know what's happening. Who is selling, supporting, or developing what? Where can I get supplies and parts? What's happening in the U.K.?

SYNTAX may be the only channel for distributing news and information to the T/S user community. It would be, in effect, the organ for a nation-wide user's group!

Stephen Greene, N. Reading, MA

LOOK ANGLES--8K/16K

Given the latitude, longitude, and local magnetic variation of a dish antenna and the longitude of a geostationary satellite, this program calculates the look angles (azimuth, elevation, and heading) for receiving signals.

Because the ZX/TS computes trig functions only in radians, LOOK ANGLES converts all input into radians and all output back into degrees.

This program runs on the 2068 without any changes after FIRST-LOADING. Adapted from a program published in ELECTRONICS, 8/25/82.

Lawrence D. Terry, Naples, FL

ASTERIODS--8K/16K

Here's a fast game written in machine code for ZX/TS machines.

Enter the first listing, then RUN and input the numbers in the POKE list. Enter lines 20-50 in the final listing over the old lines. SAVE the program on tape, then check the Syntactic Sum.

To play, RUN and avoid the asteroids by moving left and right (with 5 and 8). You get one point for each asteroid you avoid. Start a new game by pressing any key.

Craig Bird, Victoria, BC, Canada

COLORSORT--TS2068

These two programs do the same thing: POKE the attribute file with random colors, then sort the bytes, resulting in a display of the sort in progress on the screen.

Try BASIC COLORSORT first so you can see what happens. You can add a line 77 PAUSE 15 to get a better look at the sorting process. This version has a BEEP loop at the end so you'll know when it's done (it takes about 2 hours to RUN).

Now try M/C COLORSORT. You should be truly impressed. It finishes the sort in just a few seconds, PAUSEs, and starts over.

Lloyd Painter, Quackertown, PA

LINES--TS2068

Here's a program that counts on simple math to produce a random display of fans of color. It works by picking two pairs of points on the screen and drawing a series of lines between them. It leaves them on the screen for a while and then quietly picks up after itself.

OUR POLICY ON CONTRIBUTED MATERIAL

SYNTAX invites you to express opinions related to any Sinclair or Timex computer or peripheral, or the newsletter. We will print, as space allows, letters discussing items of general interest. Of course we reserve the right to edit letters to a suitable length and to refuse publication of any material.

We welcome program listings for all levels of expertise, written in either: Sinclair BASIC or Z80 machine code. Programs can be for any fun or useful purpose. We will test run each one before publishing it, but we will not debug programs; please send only workable listings. Programs submitted on cassette can be tested more quickly and with less chance of error.

In return for your listing, we will pay you a token fee of \$2.00 per program we use. This payment gives us the nonexclusive right to use that program in any form, world-wide. This means you can still use it, sell it, or give it away, and so can we.

We will consider submissions of news and hardware or software reviews. Please keep articles short (350-400 words). Again, we reserve the right to edit accepted articles to suitable length. We will pay 7 cents per 6 characters, including spaces and punctuation, for accepted articles.

When you send in articles for possible publication in SYNTAX, please include the following information:

- How to operate the program, including what to input if it does not contain prompts.
- Whether you can run the program over again and how.
- How to exit the program.
- The Syntactic Sum (program published in June 81; send SASE for a free copy).
- What RAM size program requires.
- What ROM program uses (8K, 2068, Spectrum).
- For MC programs, what addresses must change to relocate the code and what ROM calls are used.

We pay for this explanatory text at the same rate as we pay for articles in addition to payment for the program itself.

If you want us to return your original program listing or article, please include a self-addressed, stamped envelope. Otherwise, we cannot return submitted material.

HOUSE RULES AT THE LAST CHANCE

During the next few weeks you will be inundated with bargains and off-price offers. Refer to your back issues of SYNTAX as you plan to deal with various vendors. Keep these points in mind.

Vendors who never got it right before do not improve as they leave the business. Undelivered orders are not bargains. Use charge-card or COD payments to give you some leverage, and act swiftly if your order is delayed.

Know the terms before you buy. **As-is, where-is** means you must know what you're buying.

Closeouts, selloffs and other quick-disposal schemes are not seen by sellers as the start of a long-term relationship. Sellers want volume, turnover, & low order cost. Do not bet against yourself by thinking they want future benefits.

Unsupported accessories may come at low prices, but can you do repairs? Will you get enough data? Timex computers & printers are good buys even at list price, but how about the tape recorder? Can you gain by buying it? What discount will equalize the value to one from a continuing manufacturer?

Full price for full value is not the worst deal--just watch.
